Think Design.

My core strengths are product innovation, design thinking, and delivering quality user experiences.

I have a unique blend of skills spanning from design and ideation through technical execution. My background is rooted in Industrial Design and my career has touched Corporate Identity, Marketing, Graphic/Interaction Design and User Experience.

My goal is to help grow a team of designers and engineers who share my enthusiasm for creating industry-changing products and services.

Key Attributes

- Product ideation balancing user needs, business goals, and technical feasibility
- Managing and mentoring UX designers and UI developers
- Team building and identifying needs and ideal candidates
- Bridging communication between end users, designers and engineers
- Interaction design with extensive B2B and mobile experience

Methodologies

- User Centered Design
- Design Thinking
- Lean Startup/Lean UX
- Test-Driven Development
- Agile Development

Experience
